

Dear Producer,

In partnership with the AGOS GROUP, LLC, a nationally recognized human resources consulting and training company, CNA is pleased to introduce CNA AGOSNET™, an interactive, web based tool that helps CNA insureds learn to develop their own state of the art employment practices and procedures, at no additional cost. The system features sexual harassment training for supervisors and best practices tools designed to empower organizations in their efforts to properly manage their workplace and minimize incidents and litigation. This service, along with the AGOS toll free hotline for human resource consulting advice, is available to all CNA insureds that have Employment Practices Liability coverage.

This new service will be of particular value to California insureds where a new California law known as California Assembly Bill 1825 (AB 1825) requires employers with 50 or more employees, to provide a minimum of two hours of sexual harassment training to all supervisors in any location. CNA AGOSNET™ has been designed to help Insureds meet the required standards by California law, combined with the capability to track employee participation through an easy to use online tool.

In addition, CNA AGOSNET™ includes:

- **TRAC™ Training** —online sensitivity and diversity training for both management and non-management employees.
- **Weekly Training Bulletins** geared to the issues most important to frontline managers and supervisors. Consistency is the key to keeping a focus on loss prevention. Bite-sized training bulletins provide regular and ongoing training on the latest exposures.
- **Online library** of articles and management briefs on a wide range of workplace related topics—for risk managers, human resources professionals, and other professional staff. Includes state-specific information on many issues.
- **Best Practices Knowledge Base**—a searchable archive of **real-life workplace scenarios**—with strategic analysis and suggestions—to provide insight into the proper management of workplace-related risks. Use these scenarios to train or to assist in navigating around costly exposures.
- **HR Self-Assessments** on a wide range of topics help evaluate risk/exposure levels, while privately and proactively reducing exposure.
- **Model Workplace Policies and Links** to hundreds of helpful workplace-related websites.

Additional details, including instructions on how CNA insureds can access the training, are located in the Risk Management Services – Employment Practices Liability section of www.cnapro.com.

You may want to announce this important new feature to your prospective clients and existing CNA insureds that have Employment Practices Liability coverage, by providing them with the attached client letter package which includes: access instructions, AGOSNET flyer and Important Notice which provides information for the AGOS hotline.

If you have any questions, please give your Regional Underwriter a call.
